DETAILED ACTION

Allowable Subject Matter

Claims 1-40 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 21, with the allowable features the non conductive seal disposed around the perimeter of the electro optic medium and between the front and rear substrates and encompassing at least a portion of the second conductive layer and at least a portion of the raceway(claim 1); the first and second electrical connectors which extend from the conductive layers with the first electrical connector extending from the fourth surface of the second substrate and over at least a portion of the first edge of the second substrate and towards the first overhang of the front substrate and the connecting to the first conductive surface at the first over hang region so as to be behind the front substrate and substantially out of view through the first surface of the front substrate the non conductive seal and non conductive portion substantially electrically isolating the first electrical connector from the second conductive layer(claim 21). Therefore claims 1-40 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
